

EQ where do I need transitions?

⑤

What are transitions?

- phrases or words that provide a connection between ideas, paragraphs, and sentences.

Where can they be used?

Between paragraphs

- divides minor ideas/sub topics  
- helps show a logical connection

Between sentences

- shows relationships between your ideas in each sentence  
- generally a word or two

Between parts of a sentence

- shows how phrases connect within your sentence.

My Intro with Transitions

CONCLUSION ~~Paragraph~~ notes

DO

- Summarize your main ideas (use your topic sentences)
- ~~say~~ say your thesis in a new way
- include transitions
- Explain WHY it is important or how it applies today

DON'T

- focus on minor details
- introduce new info
- say your thesis exactly the same way.
- use lame and overused transitions like "in conclusion" and "in summary"
- use "I"
- Get emotional
